PROJECTS

Customer Churn Analysis and Prediction | MySQL, Python, Power BI

github.com/skshambytes/Analysis_of_Customer_Churn

- Analyzed **6,418** customer records using SQL and identified **1,732** churned customers (**27% churn rate**) through segmentation and KPI analysis.
- Built a Random Forest classification model with data cleaning, feature engineering and label encoding to flag customers at risk of churn and visualized results in Power BI.

Customer Behavior Analysis | Python, SQL

github.com/skshambytes/Customer_Behavior_Analysis

- Cleaned and analyzed shopping data covering age, purchase amounts, discounts and purchase frequency to identify customer segments and purchasing patterns.
- Created age groups and performed exploratory analysis to examine shopping behavior and purchase patterns associated with discounts and promotional codes.

Excel Sales Dashboard and Analytics | Excel, Power Query

github.com/skshambytes/Excel-Dashboard-Analytics

- Built an interactive dashboard for **2,400** transactions (**$649K** in sales, **11,997 units**) using Power Query, 11 PivotTables, PivotCharts, maps and slicers.
- Created KPI cards for average rating (**3.96/5**) and delivery time (**2.34 days**) and analyzed sales by channel, product, gender and state, plus weekly and monthly trends.
